

Information Needed for Initial Notification  
(For Maine Gas Dispensing Facilities only)

40 CFR 63, Subpart CCCCCC

National Emission Standards for Hazardous Air Pollutants for  
Source Categories: Gas Dispensing Facilities  
Notification due May 9, 2008

The need to file this notification is based on monthly gasoline throughput.

- Monthly Throughput: ☐ Less than 10,000 gallons of gasoline per month — Initial notification NOT needed. **STOP HERE**
- ☐ Greater than 10,000 gallons per month & less than 100,000 gallons per month - Initial notification NOT needed. **STOP HERE**
- ☐ More than 100,000 gallons of gasoline per month facilities subject Chapter 118 Stage II requirements – Initial notification NOT needed. **STOP HERE**
- ☐ **More than 100,000 gallons of gasoline per month not subject to Stage II vapor recovery requirements. INITIAL NOTIFICATION REQUIRED. CONTINUE BELOW**

UST Registration number \_\_\_\_\_  
(Complete only if a registration number has been previously assigned by the Maine Department of Environmental Protection)

- Compliance Date: ☐ Existing source: **January 10, 2011**
- ☐ New source (began construction after November 9, 2006 and your facility startup was before January 10,2008): **January 10, 2008**
- ☐ New source (began construction after November 9, 2006 and your facility startup was after January 10,2008: Compliance date is upon startup: \_\_\_\_\_

**For Stage I facilities with monthly throughputs greater than 100,000 gallons per month and not subject to Maine Chapter 118 Stage II requirements**

Provide a brief description of the nature, size, design, and method of operation of the gasoline distribution facilities and an identification of the types of gasoline storage tanks and vent pipes. *[Example: This facility is a 24-hour convenience store with about 120,000 gallons per month in sales of gasoline. We have four dispenser islands and three 15,000-gallon capacity underground storage tanks with pressure vacuum valves on each storage tank vent.]*

This existing facility must comply with all the requirements below by January 10, 2011  
(Facilities must continue to comply with Maine regulations, the compliance date applies to the requirements for vent valve testing and static pressure testing).

- A) (1) Minimize gasoline spills  
(2) Clean up spills as expeditiously as practicable  
(3) Cover all open gasoline containers and all gasoline storage tank fill-pipes with a gasketed seal when not in use  
(4) Minimize gasoline sent to open-waste collection systems that collect and transport gasoline to reclamation and recycling devices, such as oil/water separators.
- B) Submerged filling (as specified in section 63.11117(b)) currently used for all gasoline storage tanks having a capacity of greater than or equal to 250 gallons
- C) Management Practices listed in Table 1 of Subpart CCCCCC, except emissions from the following:  
(1) Tanks constructed on or before January 10, 2008, with a capacity of less than 2,000 gallons  
(2) Tanks constructed after January 10, 2008, with a capacity of less than 250 gallons  
(3) Tanks equipped with floating roofs, or the equivalent.

- ☐ Complete all information on the other side of the form
- ☐ Sign and date the bottom
- ☐ Put your return address and a stamp on it
- ☐ Mail it by Friday, May 9, 2008
